

| Phase | Year Group | Topic   | Scientific Enquiry Questions   | Main EYFS/National Curriculum Focus  | Disciplinary Knowledge |                             |
|-------|------------|---|--|--|------------------------|-----------------------------|
| EYFS  | Nursery    | Seasonal Change/ Materials                            | What is Beeston like in Autumn?<br>Which materials can I find in my home?  | To observe the signs of Autumn.<br>To know that some leaves change colour and fall from trees.<br>To describe the look and feel of household objects.<br>To use words such as soft/hard/bendy/rough/smooth to describe objects.<br>To sort objects with similar properties.  |                        |                             |
|       |            | Materials and Forces                                  | How do baby toys work?   | To talk about the differences between materials and changes they notice.<br>To explore how things work.<br>To explore and talk about different forces they can feel.   |                        |                             |
|       |            | Plants and Animals                                    | What is a plant? What is an animal?<br>What do plants/animals need to grow?<br>How do plants/animals change and grow?  | To plant seeds and care for growing plants.<br>To understand the key features of the life cycle of a plant and an animal.<br>To show care and concern for living things and the environment.<br>To talk about what they see using a wide vocabulary.   |                        |                             |
|       |            | Changing States/Floating and Sinking/Magnets          | What happens when we heat chocolate?<br>What happens when we cool water?<br>Which objects float and sink? What happens when we block a light source?<br>What type of materials are magnets attracted to? | To heat/cool different ingredients.<br>To observe what happens when we melt things.<br>To explore floating and sinking.<br>To investigate shadows.<br>To explore magnets.  |                        |                             |
|       | Reception  | Seasonal Change                                       | What is Beeston like in Autumn?  | To know that Autumn is one of four seasons.<br>To observe the signs of Autumn around school and the local area.<br>To know that some leaves change colour and fall from trees.<br>To know that the weather becomes colder and wetter.  |                        |                             |
|       |            | Seasonal Change/Life Cycles                           | What is Beeston like in Spring? How do plants change? How do animals change? How do these changes take place?  | To know that Spring is one of four seasons.<br>To observe the signs of Spring around school and the local area.<br>To know that blossom forms on some trees.<br>To know that the weather becomes warmer and sunnier.<br>To know that a plant/flower starts as a seed, grows, flowers and dies.<br>To know the stages of the life cycles of a butterfly and frog.<br>To talk about the observations I make.<br>To know that a plant/flower will need soil, sun and water to grow.<br>To know that an animal will need food, water and care to grow. |                        |                             |
|       |            | Contrasting Environments (climate and native animals) | Where do we live and what is the weather like? Where is our place in the world? How is England different to Kenya and Australia?   | To know that the weather in England is varied and changeable.<br>To know that the weather is generally hotter in Kenya and parts of Australia.<br>To name animals native to England, Kenya and Australia.  |                        |                             |
|       |            | Seasonal Change                                       | What is Beeston like in Summer?  | To know that Summer is one of four seasons.<br>To observe the signs of Summer around school and the local area.<br>To know that leaves are green on many trees at this time of year.<br>To know that the weather is warmer and sunnier at this time of year.   |                        |                             |
|       | Key Year 1 | Seasonal Change                                       | What are the differences between the seasons?  | observe changes across the 4 seasons<br>observe and describe weather associated with the seasons and how day length varies   |                        | asking simple questions and |

|        |                                  |   |  |   |
|--------|----------------------------------|---|--|---|
| Year 2 | Animals including humans         | How are animals different?<br>How do we use our senses to find out about the world? | <p>identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals</p> <p>identify and name a variety of common animals that are carnivores, herbivores and omnivores</p> <p>describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals including pets)</p> <p>identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense</p>   | <p>recognising that they can be answered in different ways</p> <p>observing closely, using simple equipment</p> <p>performing simple tests</p> <p>identifying and classifying using their observations and ideas to suggest answers to questions</p> <p>gathering and recording data to help in answering questions</p> |
|        | Everyday Materials               | Can you identify and describe everyday materials?                                   | <p>distinguish between an object and the material from which it is made</p> <p>identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock</p> <p>describe the simple physical properties of a variety of everyday materials</p> <p>compare and group together a variety of everyday materials on the basis of their simple physical properties</p>  |   |
|        | Plants                           | What do you know about plants and trees?  | <p>identify and name a variety of common wild and garden plants, including deciduous and evergreen trees</p> <p>identify and describe the basic structure of a variety of common flowering plants, including trees</p>   |   |
|        | Animals including Humans         | What do animals need to grow and change?  | <p>notice that animals, including humans, have offspring which grow into adults</p> <p>find out about and describe the basic needs of animals, including humans, for survival (water, food and air)</p> <p>describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene</p>  |   |
|        | Everyday Materials               | What are the suitable materials to keep us dry?                                     | <p>identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses</p> <p>find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching</p>   |   |
|        | Living things and their Habitats | How do living things survive in different habitats?                                 | <p>explore and compare the differences between things that are living, dead, and things that have never been alive</p> <p>identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other</p> <p>identify and name a variety of plants and animals in their habitats, including microhabitats</p> <p>describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food</p> |   |
|        | Plants                           | What makes plants different?  | <p>observe and describe how seeds and bulbs grow into mature plants</p> <p>find out and describe how plants need water, light and a suitable temperature to grow and stay healthy</p>  |   |

|                   |        |                                  |   |  |   |
|-------------------|--------|----------------------------------|---|--|---|
| Lower key Stage 2 | Year 3 | Forces and Magnets               | How useful are forces?                  | <p>compare how things move on different surfaces</p> <p>notice that some forces need contact between 2 objects, but magnetic forces can act at a distance</p> <p>observe how magnets attract or repel each other and attract some materials and not others</p> <p>compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials</p> <p>describe magnets as having 2 poles</p> <p>predict whether 2 magnets will attract or repel each other, depending on which poles are facing</p> | <p>asking relevant questions and using different types of scientific enquiries to answer them</p> <p>setting up simple practical enquiries, comparative and fair tests</p> <p>making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers</p> <p>gathering, recording, classifying and presenting data in a variety of ways to help in answering questions</p> <p>recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables</p> <p>reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions</p> |
|                   |        | Animals including Humans         | How do animals and humans stay healthy? | <p>identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat</p> <p>identify that humans and some other animals have skeletons and muscles for support, protection and movement</p>   |   |
|                   |        | Rocks                            | How are rocks and soils formed?         | <p>compare and group together different kinds of rocks on the basis of their appearance and simple physical properties</p> <p>describe in simple terms how fossils are formed when things that have lived are trapped within rock</p> <p>recognise that soils are made from rocks and organic matter</p>   |   |
|                   |        | Light                            | How do light and shadows change?        | <p>recognise that they need light in order to see things and that dark is the absence of light</p> <p>notice that light is reflected from surfaces</p> <p>recognise that light from the sun can be dangerous and that there are ways to protect their eyes</p> <p>recognise that shadows are formed when the light from a light source is blocked by an opaque object</p> <p>find patterns in the way that the size of shadows change</p>  |   |
|                   |        | Plants                           | How do plants survive?                  | <p>identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers</p> <p>explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant</p> <p>investigate the way in which water is transported within plants</p> <p>explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal</p>   |   |
|                   | Year 4 | Living things and their Habitats | What organisms live in our local area?  | <p>recognise that living things can be grouped in a variety of ways</p> <p>explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment</p> <p>recognise that environments can change and that this can sometimes pose dangers to living things</p>  |   |
|                   |        | Animals and Humans               | How are humans conserving food chains?  | <p>describe the simple functions of the basic parts of the digestive system in humans</p> <p>identify the different types of teeth in humans and their simple functions</p> <p>construct and interpret a variety of food chains, identifying producers, predators and prey</p>   |   |

|                   |        |                          |  |   |   |
|-------------------|--------|--------------------------|--|---|---|
| Upper Key Stage 2 | Year 5 | States of Matter         | How can states of matter be changed?                 | <p>compare and group materials together, according to whether they are solids, liquids or gases</p> <p>observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)</p> <p>identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature</p>   | <p>using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions</p> <p>identifying differences, similarities or changes related to simple scientific ideas and processes</p> <p>using straightforward scientific evidence to answer questions or to support their findings.</p>  |
|                   |        | Electricity              | How can I make a switch?                             | <p>identify common appliances that run on electricity</p> <p>construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers</p> <p>identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery</p> <p>recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit</p> <p>recognise some common conductors and insulators, and associate metals with being good conductors</p>  |   |
|                   |        | Sound                    | How do we hear sounds?                               | <p>identify how sounds are made, associating some of them with something vibrating</p> <p>recognise that vibrations from sounds travel through a medium to the ear</p> <p>find patterns between the pitch of a sound and features of the object that produced it</p> <p>find patterns between the volume of a sound and the strength of the vibrations that produced it</p> <p>recognise that sounds get fainter as the distance from the sound source increases</p>  |   |
|                   | Year 5 | Earth and Space          | How does the solar system affect our lives on earth? | <p>describe the movement of the Earth and other planets relative to the sun in the solar system</p> <p>describe the movement of the moon relative to the Earth</p> <p>describe the sun, Earth and moon as approximately spherical bodies</p> <p>use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky</p>   | <p>planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary</p> <p>taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate</p> <p>recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter</p> |
|                   |        | Properties of Materials  | How can we classify and compare materials?           | <p>compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets</p> <p>know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution</p> <p>use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating</p> <p>give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic</p> <p>demonstrate that dissolving, mixing and changes of state are reversible changes</p> <p>explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda</p> |   |
|                   |        | Animals including Humans | How will I change overtime?                          | <p>describe the changes as humans develop to old age</p>  |   |

|        |                                  |   |   |  |
|--------|----------------------------------|---|---|--|
|        | Living things and their habitats | What are the similarities and difference of animal and plant life cycles? | describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird<br>describe the life process of reproduction in some plants and animals   | graphs, bar and line graphs<br>using test results to make predictions to set up further comparative and fair tests<br>reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and a degree of trust in results, in oral and written forms such as displays and other presentations<br>identifying scientific evidence that has been used to support or refute ideas or arguments |
|        | Forces                           | How do forces affect the way things move?                                 | explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object<br>identify the effects of air resistance, water resistance and friction, that act between moving surfaces<br>recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect   |  |
| Year 6 | Electricity                      | How can we change how circuits work?                                      | associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit<br>compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches<br>use recognised symbols when representing a simple circuit in a diagram   |  |
|        | Light                            | How does light help us see things?  | recognise that light appears to travel in straight lines<br>use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye<br>explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes<br>use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them |  |
|        | Evolution and Inheritance        | What might future humans be like?   | recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago<br>recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents<br>identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution                                   |  |
|        | Living things and their habitats | How can we sort and categorise living things?                             | describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals<br>give reasons for classifying plants and animals based on specific characteristics  |  |
|        | Animals including Humans         | What does our circulatory system do?                                      | identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood<br>recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function<br>describe the ways in which nutrients and water are transported within animals, including humans   |  |
