

Nursery Spring 2		
Enquiry Question: I wonder how things grow and change?		
Development Matters Objectives:	Core Knowledge & key questions	Local links and people
<p>To plant seeds and care for growing plants.</p> <p>To understand the key features of the life cycle of a plant and an animal.</p> <p>To show care and concern for living things and the environment.</p> <p>To talk about what they see using a wide vocabulary.</p>	<p>What is a plant?</p> <ul style="list-style-type: none"> To name some features of a plant ie leaves, stem, flower. To sort objects by plant/not plant. <p>What is an animal?</p> <ul style="list-style-type: none"> To name some features of a chick/caterpillar ie head, body. To sort pictures by animal/not animal. <p>What do plants/animals need to grow?</p> <ul style="list-style-type: none"> To know that a plant/flower needs soils and water to grow. To know that an animal needs food, water and care to grow. <p>How do plants/animals change and grow?</p> <ul style="list-style-type: none"> To know that a plant/flower starts as a seed. To know that a chick/caterpillar starts as an egg. To know that a plant/flower/animal will grow and then die. To observe and comment on changes I see. To talk about the 'before' and 'now'. To describe how some living things grow. 	<p>Looking at plant and animal life around the school grounds and the local park.</p>
<p>Prior and Future Learning</p> <p>Discussion/drawing task given prior to starting the topic. Encouragement to talk about the plants and animals they may have at home or in their garden. YR – to know the life cycle of a butterfly and a frog. To know that there are different vegetables grow in England and Kenya.</p>		<p>Linked texts</p> <p>'The Very Hungry Caterpillar' Eric Carle</p> <p>'Jack and the Beanstalk' Traditional tale</p>
EYFS Strand KEY	Vocabulary	Outdoors
<p>Past and Present</p> <p>People, Culture and Communities</p> <p>The Natural World</p>	Plant/flower/animal/seeds/soil/egg/chick/caterpillar/butterfly/change/grow	Plants and animals in the school grounds. Planting in the Greenmount garden.

Reception Spring 2		
Enquiry Question: I wonder how things grow and change?		
Development Matters Objectives:	Core Knowledge & key questions	Local links and people
<p>To understand the effect of changing seasons on the natural world around them.</p> <p>To explore the natural world around them.</p> <p>To describe what they see, hear and feel whilst outside.</p> <p>To recognise some similarities and differences between life in this country and life in other countries.</p>	<p>What is Beeston like in Spring?</p> <ul style="list-style-type: none"> To know that Spring is one of four seasons. To observe the signs of Spring around school and the local area. To know that blossom forms on some trees. To know that the weather becomes warmer and sunnier. <p>How do plants change?</p> <ul style="list-style-type: none"> To know that a plant/flower starts as a seed, grows, flowers and dies. <p>How do animals change?</p> <ul style="list-style-type: none"> To know the stages of the life cycles of a butterfly and frog. <p>How do these changes take place?</p> <ul style="list-style-type: none"> To talk about the observations I make. To know that a plant/flower will need soil, sun and water to grow. To know that an animal will need food, water and care to grow. <p>Do the same plants grow in England and Kenya?</p> <ul style="list-style-type: none"> To know that some vegetables need warm weather to grow. To know that we cannot grow all vegetables in England. To name some vegetables people may grow and eat in Kenya that we cannot grow here. 	<p>Local walk in the park to look for signs of Spring. Talking to our link school in Kenya. And parents from Africa.</p>
Prior and Future Learning		Linked texts
<p>Nursery – pupils will know the difference between a plant and an animal. They will know what animals and plants need to grow and the changes that occur as they grow.</p> <p>Links to Science Seasonal change – across Y1.</p> <p>Y1 - Hot and cold climates</p> <p>Y2 – Continents. Comparing UK and Kenya (London and Nairobi, Leeds and Chiakariga)</p>		<p>The Very Hungry Caterpillar Eric Carle</p> <p>Oliver’s Vegetables Vivian French, Alison Bartlett</p>

Spring walk in the park.</p>

Year: 1

Topic: Animals

Summit Point Question: How are animals different?

National Curriculum Objectives:

identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals

identify and name a variety of common animals that are carnivores, herbivores and omnivores

describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals including pets)

Prior Learning:

In Early Years children should:

- Be able to identify different parts of their body.
- Have some understanding of healthy food and the need for variety in their diets.
- Be able to show care and concern for living things.
- Know the effects exercise has on their bodies.
- Have some understanding of growth and change.
- Can talk about things they have observed including animals

Future Learning:

In Year 2 children will:

- Know that animals, including humans, have offspring which grow into adults.
- Know the basic stages in a life cycle for animals, including humans.
- Find out and describe the basic needs of animals, including humans, for survival (water, food and air).
- Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.

Substantive Knowledge & key questions:

How are animals different?

Identify the features of a fish

Identify the features of a bird

Know the similarities and differences of birds

Observe a range of birds

Identify features of reptiles

Identify features of mammals

Know that humans are mammals

Know the features of an amphibian

What do animals eat?

Know animals that are herbivores, carnivores and omnivores

Classify animals according to their teeth

Summit point: how are animals different?

Local Links:

Mrs Rahman Budgies, Miss Coates Dog

Disciplinary Knowledge- Working Scientifically:

Ask simple questions and recognise that they can be answered in different ways

Observe closely using simple equipment

Perform simple tests

Identify and classify

Use observations and ideas to suggest answers to questions

Gather and record data to help in answering questions

Enquiry Type:

Comparative/Fair Testing Research Observation over Time
Pattern Seeking Identifying, Grouping and Classifying

Linked Texts:

Rangtan in my bedroom, The Journey home

Key Vocabulary:

fish, amphibians, reptiles, birds, mammals, omnivores, carnivores, herbivores.

Key Scientists:

Jane Goodall (Primatologist) Joan Beauchamp Procter (Zoologist)

Year: 2

Topic: Animals including Humans

Summit Point Question: What do animals need to grow and change?

National Curriculum Objectives:

notice that animals, including humans, have offspring which grow into adults

find out about and describe the basic needs of animals, including humans, for survival (water, food and air)

describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene

Prior Learning:

In Year 1 Children should: • Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals. • Identify and name a variety of common animals that are carnivores, herbivores and omnivores.

Future Learning:

In Year 3 Children will: • Identify that animals, including humans, need the right types and amount of nutrition, and they cannot make their own food; they get their nutrition from what they eat. • Know how nutrients, water and oxygen are transported within animals and humans. • Know about the importance of a nutritious, balanced diet. • Identify that humans and some other animals have skeletons and muscles for support, protection and movement.

Substantive Knowledge & key questions:

Recap: Retrieval sheet/Sorting animals using animal groups

1. Do all animals look like their babies?

Chn will be able to describe that animals have babies and not all animals look like their parents.

Chn will know the names of at least 5 baby animals.

2. How do animals change over time?

Chn will know the lifecycle of various animals groups. (mammal, bird, amphibian, insect)

3. How have you changed since you were born?

Chn will create a timeline of their growth and observe change and understand their needs change as they grow.

4. What do living things need to survive?

Chn will know that humans and animals need water, food and air to survive. Why is it important that we stay active?

Chn will understand that having an active lifestyle is vital for humans to stay healthy.

5. How do we have a healthy diet?

Chn will know about the different food types and the importance of eating the correct amounts.

6. Why do we need to wash our hands?

Chn will learn about hygiene.

Chn will know how to stay fit, healthy and clean.

Pattern Seeking, Identifying, Grouping, and Classifying

Linked Texts:

The disgusting Sandwich, Fussy Freda, Tad

Key Vocabulary:

life cycle, baby, toddler, child, teenager, adult, water, food, exercise, hygiene, offspring

Key Scientists:

Maria Sibylla Merian (Scientific Illustrator & Entomologist) Louis Pasteur (Biologist & Chemist)

Year: 3

Topic: Animals including Humans

Summit Point Question:

National Curriculum Objectives:

identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat

identify that humans and some other animals have skeletons and muscles for support, protection and movement

Prior Learning:

In Year 2 children should: • Know that animals, including humans, have offspring which grow into adults. • Know the basic stages in a life cycle for animals, including humans. • Find out and describe the basic needs of animals, including humans, for survival (water, food, and air). • Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.

Future Learning:

In Year 4 children will: • Describe the simple functions of the basic parts of the digestive system in humans. • Identify the different types of teeth in humans and their simple functions. • Construct and interpret a variety of food chains, identifying producers, predators and prey.

Substantive Knowledge & key questions:

What nutrition is needed for a healthy human?

- Children discuss own food choices and organise into food groups using eatwell plate.
- Applying knowledge to self-assess own habits and then assessing the school's menu.

What types of nutrition do different animals need?

- Dissect fake animal scat as evidence for classifying into herbivores, scavengers and omnivores.
- Children learn that different animal groups need different nutrition and different portion sizes depending on habits and nutritional value.
- Look at evidence using animal skeletons to classify into herbivores, scavengers and omnivores.

Why are skeletons so important?

- Naming bones in a human body (skull, spine, ribcage, pelvis, femur, humerus among others)
- Children to know that a human skeleton is for support, protection and movement.
- Children learn to classify animals including humans into vertebrates and invertebrates.
- Children recognise endoskeletons, exoskeletons and hydrostatic skeletons.

Why are muscles so important?

- Children recognise muscles on their own body and the movement they create. Children create a diagram of the main muscle groups in the body.
- Children investigate if longer legs or bigger muscles matter.

Enquiry Type:

Comparative/Fair Testing, Research, Observation over Time, Pattern Seeking, Identifying, Grouping and Classifying

Key Vocabulary:

carbohydrates, diet, eat, endoskeleton, exoskeleton, fats, fibre, food, food groups, functions, healthy, humans, invertebrates, joints, meals, minerals, movement, muscles, nutrition, protection, protein, skeletons, support, types, vertebrates, vitamins

Local Links:

Local animals and animal scat from UK animals, used Greenmount menu to categorise nutritional value, bird-watching, using recognisable packaging for nutritional value

Disciplinary Knowledge- Working Scientifically:

ask relevant questions and using different types of scientific enquiries to answer them.

Set up simple practical enquiries,

Comparative and fair tests.

Make systematic and careful observations.

Take accurate measurements using

standard units.

Use a range of equipment to take accurate measurements.

Record findings using simple scientific language, drawing, labelled diagrams, bar charts, tables

Report on findings from enquiries

Use results to draw simple conclusions, make predictions for new values, suggest improvements, raise further questions

Identify differences, similarities or changes related to simple scientific ideas and processes

Use straightforward scientific evidence to answer questions or support their findings

Linked Texts:

Bone by bone, Human body, dragons love tacos

Key Scientists:

Wilhelm Rontgen (Mechanical Engineer & Physicist) Ibn Sina "Avicenna" (Physician)

Year:

6

Topic: Animals including Humans

Summit Point Question: What does our circulatory system do?

National Curriculum Objectives:

identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood.

recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function.

describe the ways in which nutrients and water are transported within animals, including humans.

Prior Learning:

In Year 5 children should: • Describe the changes as humans develop to old age. In Year 4 children should: • Describe the simple functions of the basic parts of the digestive system in humans. • Identify the different types of teeth in humans and their simple functions. • Construct and interpret a variety of food chains, identifying producers, predators and prey.

Future Learning:

In KS3 children will learn: • The hierarchical organisation of multicellular organisms: from cells to tissues to organs to systems to organisms. • The tissues and organs of the human digestive system, including adaptations to function and how the digestive system digests food (enzymes). • Calculations of energy requirements in a healthy daily diet. • The consequences of imbalances in the diet, including obesity, starvation and deficiency diseases. • The structure and functions of the gas exchange system in humans, including adaptations to function. • The effects of recreational drugs (including substance misuse) on behaviour, health and life processes.

Substantive Knowledge & key questions:

Lesson 1: What do we know about the circulatory system?

Knowledge harvest - Children to complete life size drawing of the circulatory system - can children label the parts?

Lesson 2: What does our blood do?

To understand what blood is and the roles it has within the body. What are the components of blood? What are their functions?

Lesson 3: What is the role of the heart in the circulatory system?

Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood. What is the heart? What is the role of the heart?

Lesson 4: How does exercise affect our circulatory system?

Investigation: Impact of exercise on the function of our circulatory system. What happens to your pulse when you do exercise? Why might this be?

Lesson 5/6 - How do our diet, drugs and lifestyle affect our circulatory system?

To understand the impact of different lifestyle choices on the health of our bodies. (PSHE link)
